

Ease Federal Reporting with Ed-Fi and CIID's *Generate* Application

Using Ed-Fi's *Generate* plugin, State Education Agencies can increase automation and experience an error-free federal reporting process.

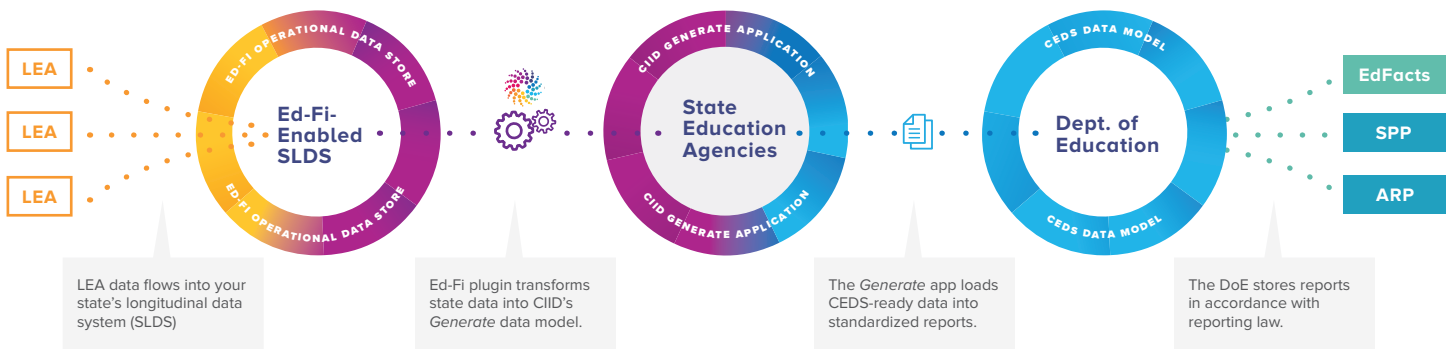

EXTRACT, TRANSFORM, LOAD AND REPORT YOUR DATA — FROM LEA TO DOE

Improved data quality and automation for federal reporting is an always-evolving goal for SEAs. Now it's easier than ever—thanks to a partnership between the Ed-Fi Alliance and the Center for the Integration of IDEA Data (CIID).

With CIID's free *Generate* application, Ed-Fi-enabled SEAs can more easily compile and submit reporting for EdFacts, SPP and ARP needs. Using Ed-Fi's new *Generate* plugin, you can transform your state's LEA data into the CEDS data model—the same model adopted by the Department of Education for all reporting and analyzing needs.

The *Generate* Reporting Flow
